Radiocommunication Sector of ITU

Report ITU-R BT.2160-1
(10/2010)

**Features of three-dimensional television
video systems for broadcasting**

BT Series
Broadcasting service
(television)

International
Telecommunication
Union

Foreword

The role of the Radiocommunication Sector is to ensure the rational, equitable, efficient and economical use of the radio-frequency spectrum by all radiocommunication services, including satellite services, and carry out studies without limit of frequency range on the basis of which Recommendations are adopted.

The regulatory and policy functions of the Radiocommunication Sector are performed by World and Regional Radiocommunication Conferences and Radiocommunication Assemblies supported by Study Groups.

Policy on Intellectual Property Right (IPR)

ITU-R policy on IPR is described in the Common Patent Policy for ITU-T/ITU-R/ISO/IEC referenced in Annex 1 of Resolution ITU-R 1. Forms to be used for the submission of patent statements and licensing declarations by patent holders are available from <http://www.itu.int/ITU-R/go/patents/en> where the Guidelines for Implementation of the Common Patent Policy for ITU-T/ITU-R/ISO/IEC and the ITU-R patent information database can also be found.

Series of ITU-R Reports

(Also available online at <http://www.itu.int/publ/R-REP/en>)

Series	Title
BO	Satellite delivery
BR	Recording for production, archival and play-out; film for television
BS	Broadcasting service (sound)
BT	Broadcasting service (television)
F	Fixed service
M	Mobile, radiodetermination, amateur and related satellite services
P	Radiowave propagation
RA	Radio astronomy
RS	Remote sensing systems
S	Fixed-satellite service
SA	Space applications and meteorology
SF	Frequency sharing and coordination between fixed-satellite and fixed service systems
SM	Spectrum management

Note: This ITU-R Report was approved in English by the Study Group under the procedure detailed in Resolution ITU-R 1.

REPORT ITU-R BT.2160-1

Features of three-dimensional television video systems for broadcasting

(2009-2010)

TABLE OF CONTENTS

	<i>Page</i>
Summary	4
1 Motivations for the introduction of 3DTV broadcasting.....	4
2 Background to possible 3DTV systems	5
3 A hierarchical structure	5
3.1 Technology generations.....	7
3.2 Compatibility levels.....	7
3.3 Matrix points.....	8
4 First-generation 3DTV	9
5 Future generations of 3DTV.....	10
6 Expected bandwidth requirements for a first-generation system	10
7 The 3DTV broadcasting chain.....	11
7.1 Image source methods	11
7.2 Characteristics of signals in the studio	12
7.3 Programme production	12
7.4 Emission	13
7.5 Display.....	13
8 Production grammar	14
9 Psychophysical aspects of viewing stereoscopic images	14
9.1 Visual fatigue and other possible health hazards.....	14
10 Assessment methodology	15
11 The viewing environment.....	16
12 User requirements.....	16
13 Performance requirements.....	16
