

## Glass hydrometers — Conventional value for the thermal cubic expansion coefficient (for use in the preparation of measurement tables for liquids)

*Aréomètres en verre — Valeur conventionnelle pour la dilatabilité volumique thermique (à utiliser lors de l'établissement des tables de mesurage des liquides)*

First edition — 1975-09-01

UDC 542.3 : 531.754.3 : 53.081.7

Ref. No. ISO 1768-1975 (E)

**Descriptors :** laboratory glassware, hydrometers, thermal expansion.

## FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 48 has reviewed ISO Recommendation R 1768 and found it technically suitable for transformation. International Standard ISO 1768 therefore replaces ISO Recommendation R 1768-1970 to which it is technically identical.

ISO Recommendation R 1768 was approved by the Member Bodies of the following countries :

Austria	India	South Africa, Rep. of
Belgium	Iran	Spain
Canada	Ireland	Thailand
Colombia	Israel	Turkey
Czechoslovakia	Italy	United Kingdom
Egypt, Arab Rep. of	Netherlands	U.S.A.
France	New Zealand	Yugoslavia
Germany	Peru	
Greece	Poland	

No Member Body expressed disapproval of the Recommendation.

No Member Body disapproved the transformation of ISO/R 1768 into an International Standard.
