

Workmanship on building sites

Part 7. Code of practice for glazing

CAWS L40

Qualité d'exécution des travaux sur chantier
Partie 7. Code de bonne pratique pour le
vitrage

Baustellenarbeiten
Teil 7. Leitfaden für Beglasung

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Council for Building and Civil Engineering (B/-) to Technical Committee B/146, upon which the following bodies were represented:

Building Employers' Confederation
Chartered Institute of Building
Consumer Policy Committee of BSI
Department of the Environment (Building Research Establishment)
Department of the Environment (Property Services Agency)
Federation of Associations of Specialists and Sub-Contractors
Institute of Clerks of Works of Great Britain Inc
Institution of Civil Engineers
Institution of Structural Engineers
National Building Specification Ltd.
National Council of Building Materials Producers
National House Building Council
Royal Institute of British Architects
Royal Institution of Chartered Surveyors
Society of Chief Architects of Local Authorities

This British Standard, having been prepared under the direction of the Council for Building and Civil Engineering, was published under the authority of the Board of BSI and comes into effect on 30 November 1990

Contents

	Page
Foreword	3
<hr/>	
Section 1. General	
1.1 Scope	5
1.2 References	5
1.3 Definitions	5
<hr/>	
Section 2. Materials handling and preparation	
2.1 Checking, handling and site storage of materials	6
2.2 Preparation of work, materials and components	7
<hr/>	
Section 3. Glazing techniques	
3.1 Glazing blocks	11
3.2 Fixing timber beads	13
3.3 Glazing techniques for single glass	13
3.4 Glazing techniques for flush-edged insulating glass units	20
3.5 Glazing techniques for stepped insulating glass units	25
3.6 Glazing techniques for plastics glazing sheet	25
3.7 Glazing techniques for laminated glass	26
<hr/>	
Section 4. Cleaning and protection	
4.1 Cleaning	27
4.2 Protective masking	27
4.3 Protection of putty	27
4.4 Spillages of other materials	27
4.5 Indication of installed glazing	27
<hr/>	
Tables	
1 Bedding and sealing materials	8
2 Sealant widths	25
<hr/>	
Figures	
1 Setting and location blocks and distance pieces	11
2 Recommended positions of setting and location blocks	12
3 Putty fronting	13
4 Fixing glass onto back putty	13
5 Single glazing with beads using putty	14
6 Single glazing with beads using non-setting compound	15
7 Single glazing with beads using two-part rubberizing compound	15
8 Single glazing with beads using preformed load bearing strips with sealant capping	16
9 Single glazing with beads using a heel head seal	16
10 Single glazing with beads using a sealant bedding	17
11 Single glazing into grooves using gasket sections	17
12 Single glazing into grooves using non-setting compound or two-part rubberizing compound	18
13 Single glazing into grooves using sealant capping system	18
14 Single glazing into grooves using 'H' shaped structural gaskets	19
15 Single glazing into grooves using 'Y' shaped structural gaskets	19
16 Single glazing into grooves using single sided gaskets	20
17 Single glazing using channel type gaskets and pressure beads	20
