

# Code of practice for the design of road lighting —

## Part 1: Lighting of roads and public amenity areas

ICS 93.080.40

## Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee, CPL/34/8, Road lighting, upon which the following bodies were represented:

Chartered Institution of Building Services  
 Council for the Protection of Rural England  
 County Surveyors' Society  
 Department of Transport, Local Government and the Regions — Construction Directorate  
 Department of Transport, Local Government and the Regions — Highways Agency  
 General Aviation Awareness Council  
 Institute of Electrical Engineers  
 Institute of Lighting Engineers  
 Institution of Mechanical Engineers  
 Lighting Industry Federation Ltd  
 Scottish Office — Construction and Building  
 Co-opted members

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 11 December 2003

© BSI 2008

First published as CP 1004  
 January 1952  
 Second edition October 1963  
 Third edition September 1973  
 (later amended to become BS 5489-1)  
 Fourth edition as BS 5489-1  
 February 1987  
 Fifth edition August 1992  
 Sixth edition 11 December 2003

The following BSI references relate to the work on this British Standard:  
 Committee reference CPL/34/8  
 Draft for comment DC 00/241997

### Amendments issued since publication

Amd. No.	Date	Comments
15032 Corrigendum No. 1	10 March 2004	Two rows added to Table B.2
16063	28 April 2006	See foreword
A2	30 May 2008	See foreword

Committees responsible	Inside front cover
Foreword	iii
<hr/>	
1 Scope	1
2 Normative references	1
3 Terms, definitions and symbols	1
4 General principles	3
5 Appearance, siting, environmental aspects and hours of operation	5
6 Equipment, maintenance and safe working clearances	10
7 Lighting of traffic routes	13
8 Lighting of bridges and elevated roads	14
9 Lighting of subsidiary roads and associated areas, footpaths and cycle tracks	19
10 Lighting of urban centres and public amenity areas	21
11 Lighting of conflict areas	29
12 Lighting of areas around aerodromes, railways, harbours, and navigable inland waterways	33
<hr/>	
Annex A (informative) Summary of statutory requirements for the provision of lighting	36
Annex B (informative) Selection of lighting classes	37
Annex C (informative) Relationship between the luminaire and road surfaces for traffic route lighting	40
Annex D (informative) Typical luminaire maintenance factors	46
Annex E (informative) Outline of lighting design process for all-purpose traffic routes	46
Annex F (informative) Outline of lighting design process for motorways	49
Annex G (informative) Example of a procedure for checking the lighting design of bends on traffic routes	51
Annex H (informative) Outline of lighting design process for subsidiary roads and associated areas	55
Annex I (informative) Outline of lighting design process for lighting urban centres and public amenity areas	57
Annex J (informative) Luminaire and column positions for typical single level junctions and roundabouts using 10 m or 12 m columns	61
<hr/>	
Bibliography	74
<hr/>	
Figure C.1 — “T” shaped bright area produced by a single luminaire	41
Figure G.1 — Isoluminance template	52
Figure G.2 — Inadequate coverage of road	53
Figure G.3 — Additional luminaire covering two dark areas	54
Figure G.4 — Spacing set for inside carriageway	54
Figure G.5 — Additional luminaire covering dark area on outside carriageway	55
Figure I.1 — Worksheet for the installation design process	58
Figure J.1 — T-junctions on straight roads	61
Figure J.2 — T-junctions on bends	62
Figure J.3 — Staggered junctions	63
Figure J.4 — Crossroads	64
Figure J.5 — Y-junctions	65
Figure J.6 — Fork-junctions	66
Figure J.7 — Junctions with triangular islands (minor road at obtuse angle)	67
