

Specification for

Ground granulated blastfurnace slag for use with Portland cement

Laitier granulé de hauts fourneaux broyé pour
utilisation avec ciment Portland –
Spécifications

Gemahlener Hochofenschlackensand als
Bindemittel zur Verwendung mit
Portlandzement

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Technical Sector Board for Building and Civil Engineering (B/-) to Technical Committee CAB/1, upon which the following bodies were represented:

Association of Consulting Engineers
 Association of Quality Pulverised Fuel Ash Suppliers
 Brick Development Association
 British Aggregate Construction Materials Industries
 British Cement Association
 British Precast Concrete Federation
 British Ready Mixed Concrete Association
 British Steel Industry
 Cementitious Slag Makers Association
 Concrete Society
 County Surveyors' Society
 Department of the Environment (Building Research Establishment)
 Department of the Environment (Property Services Agency)
 Department of Transport
 Electricity Industry in United Kingdom
 Federation of Civil Engineering Contractors
 Institute of Concrete Technology
 Institution of Civil Engineers
 Institution of Structural Engineers
 Mortar Producers Association
 Royal Institution of Chartered Surveyors
 Society of Chemical Industry
 Water Services Association of England and Wales

This British Standard, having been prepared under the direction of the Technical Sector Board for Building and Civil Engineering, was published under the authority of the Standards Board and comes into effect on 1 April 1992

© BSI 1992

First published September 1986
 Second edition April 1992

Foreword	2
Specification	
1 Scope	4
2 Definitions	4
3 Composition and manufacture	4
4 Fineness	4
5 Glass content	4
6 Compressive strength	4
7 Initial setting time	4
8 Soundness	4
9 Chemical composition	4
10 Moisture content	5
11 Marking	5
12 Information to be provided	5
13 Sampling and testing for acceptance inspection at delivery	6
14 Conformity criteria (manufacturer's autocontrol)	6
Appendices	
A Conformity criteria (manufacturer's autocontrol)	7
B Product guidance	9
C Equivalence of within-mixer combinations to Portland blastfurnace cements	10
D Method of determining the glass content of ggbs by X-ray diffraction	14
E Method of determining the moisture content of ggbs	15
Tables	
1 Acceptance inspection limits	6
2 Minimum testing frequencies	7
3 Parameters determining the conformity procedure	8
4 Major defects	8
5 Acceptability constant k_A	9
6 Acceptable number of defects c_A	9
7 Compressive strength classes for combinations	12
Figures	
1 Determination of conformity limits for combinations	13
2 Schematic representation of a portion of an X-ray diffraction pattern of a ggbs	14
