Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 27107 was prepared by Technical Committee ISO/TC 34, *Food products*, Subcommittee SC 11, *Animal and vegetable fats and oils*.

This corrected version of ISO 27107:2008 incorporates the following corrections:

- Introduction, lines 9 and 10, “greater than” and “less than or equal to” replace “>” and “≤”, respectively;
- Introduction, line 11, “0 mmol to 15 mmol” has become “0 meq to 30 meq”;
- 5.6, final sentence, has been reedited to correct details of blue colour formation;
- 6.5 now contains a readability figure of 0,000 1 g, not 0,001 g;
- 9.2.2, line 1, now refers to 0,001 g instead of 0,001 mg;
- 9.2.2, paragraph 4, now contains a reedited calculation of the factor, using symbol F rather than f ;
- the heading “10.1 Calculation” has been deleted;
- Clause 10, paragraph 1, has been revised to incorporate factor, F , from the revised 9.2.2;
- In Figure A.1, “PV =” has become “PV:” (five times).
