Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this part of ISO 11816|IDF 155 may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 11816-2|IDF 155-2 was prepared by Technical Committee ISO/TC 34, *Food products*, Subcommittee SC 5, *Milk and milk products*, and the International Dairy Federation (IDF), in collaboration with AOAC International. It is being published jointly by ISO and IDF and separately by AOAC International.

ISO 11816|IDF 155 consists of the following parts, under the general title *Milk and milk products — Determination of alkaline phosphatase activity*:

- *Part 1: Milk and milk-based drinks*
- *Part 2: Fluorometric method for cheese*
- *Part 3: Enzyme photo-activated system (EPAS) method for milk and milk-based products.*

The present title of part 1 of ISO 11816 (IDF 155) is *Milk and milk products — Determination of alkaline phosphatase activity using a fluorometric method — Part 1: Milk and milk-based drinks*. This title will be changed to the title listed above when this part is revised.
