

DIN EN 1888

ICS 97.190

Supersedes
June 2003 edition.

Child care articles

Wheeled child conveyances

Safety requirements and test methods

(includes Amendments A1:2005 + A2:2005 + A3:2005)

English version of DIN EN 1888:2003 + A1:2005 + A2:2005 + A3:2005

Artikel für Säuglinge und Kleinkinder – Transportmittel auf Rädern für Kinder – Sicherheitstechnische Anforderungen und Prüfungen (enthält Änderung A1:2005 + A2:2005 + A3:2005)

Start of validity

This standard is valid from 1 November 2005.

National foreword

This standard includes safety requirements.

Amendments EN 1888:2003/A1:2005, EN 1888:2003/A2:2005, and EN 1888:2003/A3:2005 have been incorporated in this standard.

This standard has been prepared by CEN/TC 252 'Child use and care articles' (Secretariat: France).

The responsible German body involved in its preparation was the *Normenausschuss Gebrauchstauglichkeit und Dienstleistungen* (Performance Capability and Services Standards Committee), Technical Committee AA 2.2-B *Artikel für Säuglinge und Kleinkinder – Sitzen, Pflegen, Schützen, Liegen und Transportieren*.

Amendments

This standard differs from the June 2003 edition as follows:

- a) The introduction and further definitions (see 3.9, 3.14, 3.15, 3.18, 3.19, and 3.20) have been included.
- b) General requirements now also apply to combination pushchairs. Test masses D, D0, E, F, G, "hinged board" and a test ball have been introduced (see 4.1, 4.4, 4.5.2.5, 4.5.2.6, 4.5.2.7, 4.5.2.8, 4.5.2.9, 4.5.3, and 4.5.4).
- c) The small torso and large head probes have been introduced for testing entrapment between the handle and the pram body (see 6.1.2.1 and 6.1.2.4).
- d) A test using a test ball has been introduced for testing the functionality of textile parts with child retention purpose (see 6.1.8).
- e) The specifications dealing with the inadvertent release of the pram body or seat unit have been supplemented (see 6.3.3).
- f) Product innovations such as prams with a triangular chassis or pushchairs fitted with a platform have been taken into account in subclauses 7.2.2.1 and 7.2.2.6.
- g) The dynamic resistance of handles has been defined and test methods have been specified for this characteristic (see 9.1, 9.2.1, 9.2.2, and 9.3).

Continued overleaf.

Document comprises 60 pages.

- h) Further requirements for parking and braking devices have been introduced (see 10.1).
- i) Further requirements and test specifications for restraint systems and fasteners have been introduced (use of test masses D and D0) (see 15.1 and 15.2).
- j) Further warnings have been specified (see 21.2.6, 21.3.3, and 21.4.21 to 21.4.23).

In addition, the following subclauses have been editorially revised: 6.2.3.1, 7.1, 10.2.2, 15.1.1, 17.1, 17.3, 18.2, and 21.1.

Subclause 15.1.3 has been deleted.

All amendments have been indicated by means of a dark line along the left margin of the text.

EN 1888:2003 was approved by CEN on 2002-08-01 and Amendments A1, A2 and A3 on 2005-07-01.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland, and the United Kingdom.
