Publication history

First published March 1991

Second edition, October 1996

Third edition, January 2008

Amendments issued since publication

Date	Description
31 March 2008	C1: Deletion of incorrect normative reference and correction of label dimension in Clause 6

Contents

Foreword *ii*

- 1** Scope *1*
- 2** Normative references *1*
- 3** Terms and definitions *1*
- 4** Performance requirements for resistance to ignition *3*
- 5** Sampling and frequency of testing *7*
- 6** Labelling and identification *7*

Annexes

Annex A (normative) Ignitability test for polyurethane foam in slab or cushion form *10*

Annex B (normative) Ignitability test for polyurethane foam in crumb form *11*

Annex C (normative) Ignitability test for latex rubber foam *11*

Annex D (normative) Ignitability test for non-foam filling materials singly *12*

Annex E (normative) Ignitability test for composite fillings of mattresses and bed bases *12*

Bibliography *13*

List of figures

Figure 1 – Example of a label for low hazard categories *8*

Figure 2 – Example of a label for medium hazard categories *8*

Figure 3 – Example of a label for high hazard categories *9*

Figure 4 – Example of a label for very high hazard categories *9*

List of tables

Table 1 – Performance requirements for composites and notes on application of hazard categories *4*

Table 2 – Test methods relevant to types of filling *6*

Table 3 – Frequency of testing *7*

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 14, an inside back cover and a back cover.
