Body-piercing post assemblies — Reference test method for determination of nickel content by flame atomic absorption spectrometry

The European Standard EN 1810:1998 has the status of a British Standard

ICS 39.060

NO COPYING WITHOUT BSI PERMISSION EXCEPT AS PERMITTED BY COPYRIGHT LAW

## **National foreword**

This British Standard is the English language version of EN 1810:1998.

The UK participation in its preparation was entrusted to Technical Committee STI/53, Jewellery, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

#### **Cross-references**

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled "International Standards Correspondence Index", or by using the "Find" facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

### **Summary of pages**

Amendments issued since publication

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 7 and a back cover.

This British Standard, having
been prepared under the
direction of the Sector Board for
Materials and Chemicals, was
published under the authority of
the Standards Board and comes
into effect on 15 November 1998

# EUROPEAN STANDARD NORME EUROPÉENNE EUROPÄISCHE NORM

EN 1810

May 1998

ICS 39.060

Descriptors: precious metals, alloys, aluminium alloys, silver alloys, gold alloys, titanium alloys, copper alloys, steels, tests, determination, determination of content, nickel, atomic absorption spectrometrophotometry

### English version

## Body-piercing post assemblies — Reference test method for determination of nickel content by flame atomic absorption spectrometry

Ensembles de perçage de parties du corps — Méthode d'essai de référence pour la détermination de la teneur en nickel par spectrométrie d'absorption atomique de flamme

Stecker, die durch Teile des Körpers gestochen werden — Referenzprüfverfahren zur Bestimmung des Nickelgehalts durch Atomabsorptionsspektrometrie

This European Standard was approved by CEN on 10 April 1998.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.
