## **Water quality — Evaluation of ultimate aerobic biodegradability of organic compounds in aqueous medium — Static test (Zahn-Wellens method)**

*Qualité de l'eau — Évaluation, en milieu aqueux, de la biodégradabilité  
aérobie ultime des composés organiques — Essai statique  
(méthode Zahn-Wellens)*

Reference number  
ISO 9888:1999(E)

## Contents

1 Scope .....	1
2 Normative references .....	1
3 Terms and definitions .....	2
4 Principle.....	3
5 Test environment.....	3
6 Reagents.....	3
7 Apparatus .....	5
8 Procedure .....	5
9 Calculation and expression of results.....	7
10 Validity of results.....	8
11 Test report .....	8
Annex A (informative) Example of a biodegradation curve .....	10
Bibliography .....	11

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 9888 was prepared by Technical Committee ISO/TC 147, *Water quality*, Subcommittee SC 5, *Biological methods*.

This second edition cancels and replaces the first edition (ISO 9888:1991), which has been technically revised.

Annex A of this International Standard is for information only.
